

Mesotherapy and Biomesotherapy®

Mesotherapy and Biomesotherapy® are two therapeutic techniques that involve the injection of active substances directly into the dermis or subcutaneous tissues to treat a variety of aesthetic and medical conditions.

There are some differences between the two procedures:

Substances Used

In Mesotherapy, substances such as vitamins, minerals, amino acids, enzymes, and hyaluronic acid are used to treat specific conditions like localized fat, cellulite, and alopecia.

Biomesotherapy, on the other hand, employs more complex biologically active substances such as nucleic acids, peptides, and other ingredients specific to the treatment being performed.

Focus

Mesotherapy primarily focuses—due to its historical prevalence—on treating conditions like cellulite, localized adiposity, and skin imperfections.

Biomesotherapy, however, is more oriented toward skin rejuvenation, hair growth stimulation, and the treatment of more complex and specific conditions.

Tools and Techniques

Both techniques use multiple micro-needles (www.rimos.com) for substance injection, but Biomesotherapy may require the use of special devices to ensure uniform distribution of active ingredients and optimal tissue penetration.

Therapeutic Approach

Mesotherapy is a more established and widely known procedure, while Biomesotherapy is a more advanced variant that uses more sophisticated and targeted biologically active substances.

It is essential to consult a doctor or a qualified aesthetic practitioner before undergoing any Mesotherapy or Biomesotherapy treatment to assess the most suitable therapeutic options for your needs and to fully understand the potential benefits and risks associated with each technique.

Biomesotherapy® Bibliography

Biomesoterapia Manuale teorico pratico

Accademia italiana di Biomesoterapia®

Dottor Pier Carlo Ricciotti – Dottor Paolo Mosconi

Centro Studi di Omeopatia – Rimini

Edizioni sbm Noceto Parma

Finito di stampare nel mese di settembre 1990

dalla Grafica Essebierre di Abbiategrasso (Milano).
